Sustainability at NYU

http://nyu.edu/sustainability

93% *of NYU students say they feel responsible for the future condition of the environment. Here's how you can join them in acting on that responsibility!*

save energy

NYU reduced electricity consumption 4% in '08! Let's do better this year:

- **Turn off the lights, AC, and computer** when not in use.
- **Set your computer to hibernate.** Learn how: *nyu.edu/fcm/cesfaq.htm*
- **Replace your lightbulbs** with energy efficient CFLs.

get involved

Student participation is key to greening NYU. We need you:

- Find a list of **student clubs** at *nyu.edu/sustainability/studentclubs*
- Join **your school's greening group**. Find it at *nyu.edu/sustainability/greeninggroups*
- **Take an environment-related class** – we have them in more than 10 departments: *nyu.edu/sustainability/academics*
- Apply for a **Green Grant**. Visit *nyu.edu/sustainability/greengrants* to learn more.

waste less

NYU creates 5000+ tons of waste each year, and recycles 30% of it. Help us send less to the landfill:

- **Recycle paper, bottles, cans**, and more -- all campus buildings have bins.
- Use **reusable coffee mugs, bags, and water bottles**.
- Always **print double-sided**.

vote with your fork

Local, seasonal, and organic food is better for the environment – and for you:

- **Seek out sustainable food**. On campus, check out Hayden, the pilot site for sustainable changes coming to all dining halls.
